Lomonosovskoye Deposit

The Deposit is located in the northwest corner of the Republic of Kazakhstan in the Kostanay Region, 618km northwest of the country's capital of Astana and 50km west-southwest of the regional capital of Kostanay.

The iron deposit, along with a number of significant magnetite deposits, occurs in the Turgai belt of the regional Valerianovskoe magmatic arc in northern Kazakhstan. The magnetite deposits of the Valerianovskoe magmatic arc are hosted by andesitic volcanics, pyroclastics, and intercalated sediments and carbonates of the Valerianovo supergroup. Large gabbro-diorite-granodiorite igneous bodies of the Sarbai-Sokolovsk and Sulukolskaya complexes are related to the mineralization, with granitic facies interpreted as having been intruded from Mid-Visean to Permian period. In some deposits, the host sedimentary sequence is cross cut by post-ore dioritic porphyry. The Palaeozoic units of the Turgai belt in Kazakhstan are entirely covered by Mesozoic to Cainozoic sediments which are from 40 to 180 m in thickness.

The Deposit comprises two deposit sites: the North-Western ("NW") deposit and Central deposit, which differ in geological structure, genesis and composition. Although they are located within 1 km of each other, they are considered as individual deposits being separated by a diorite intrusion. Historical work to date has outlined skarn iron mineralization at the NW Deposit and the Central Deposit beneath 100m of overburden and extending to 1400m depth in the NW Deposit, and some 900m at Central. The mineralization outlined by the historical drilling has not been closed off at depth at the NW Deposit and may be open at Central.

A technical report dated December 19, 2012 prepared by Mining Associates Pty Ltd. of Australia with respect to the Deposit and compliant with NI 43-101 has been completed and was filed under the Company's profile on SEDAR on May 9, 2013. The Report provides a resource estimate for the Lomonosovskoye Project as at December 2012 as outlined below, above a cut-off grade of 20% Fe:
